Settings options

Environment: We have 2 options here. "Production" or "Staging"

LIVE URL: We have to place MAGE ERP LIVE URL here.

STAGE URL: We have to place MAGE ERP STAGE URL here.

Production Access Token: This is something get updated automatically after connection established.

Live Access Token Updated At: This tell us what time the connection is established.

Stage Access Token: This is something get updated automatically after connection established.

Stage Access Token Updated At: This tell us what time the connection is established.

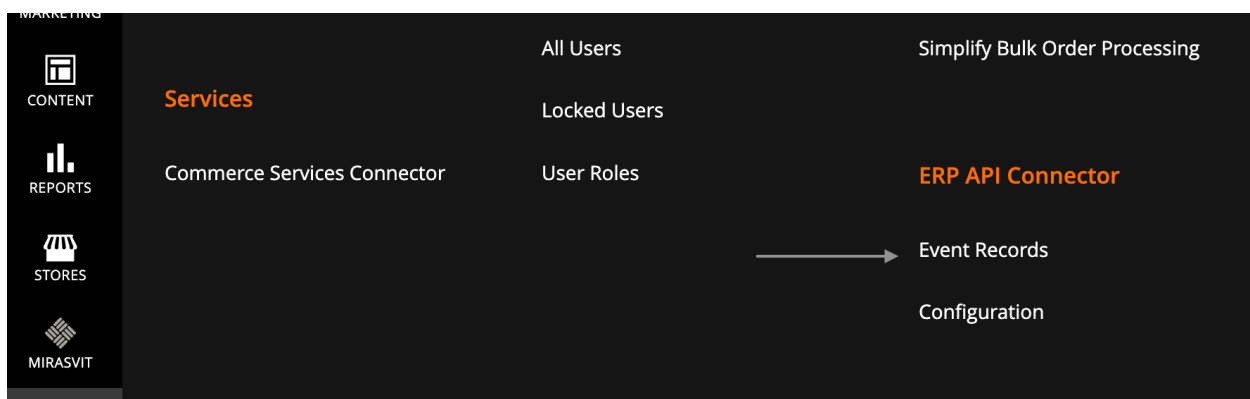

Authenticate Email: At the time of setting up MAGE ERP system, there is an email address needed within BYPOS ERP and that same email used to authenticate the connection between both systems.

Authenticate Password: Along with email, there is a password also will be provided.

Secrete Code: It's a kind of license key. This should match with the MAGE ERP system.

How can we verify this system working?

Under System > ERP API Connector menu is included.

If we go to Event Records, we can see below data

ERP API connection bridge
